

MOLECULAR SOLUTIONS FOR MEASURABLY BETTER HEALTHCARE PERFORMANCE

m2000 REALTIME SYSTEM

The Abbott m2000 RealTime System is a highly flexible and proven solution featuring a broad menu of IVD assays:

- ✓ Allowing consolidation of PCR testing on a single, reliable, high performance platform
- ✓ Availability of Laboratory Defined Applications (LDA)

The m2000 System gives today’s labs the consistency and the confidence they need – all on a single platform. It incorporates a unique combination of leading science and enabling solutions.

ASSAYS*

SARS-CoV-2
CMV
CT, CT/NG
EBV

HBV
HCV with DBS sample type
HCV Genotype II
HIV-1 with DBS sample type

HIV-1 Qualitative
High Risk HPV
MTB
MTB RIF/INH Resistance

COLLECTION KITS*

Cervi-collect specimen collection kit
multi-collect kit

* For *in vitro* diagnostic use.
